

# Social Brain Research at the *Center for Interdisciplinary Brain Sciences Research*

Adults (18~35 years old) are needed for a one-hour research study exploring brain function during social interaction.

## Participation involves evaluation including:

- Cognitive and behavioral evaluation
- Brain imaging. NIRS scans are safe, non-invasive and do not use X-rays or radiation. We look at function of your brain.

## You will receive:

- Cognitive and behavioral assessment, with a research report of the assessment results upon request.
- Access to ongoing updates about the outcomes of the study.
- Payment of \$20 for your participation.

For more information, or to enroll in the study, contact [stanfordbrain@stanford.edu](mailto:stanfordbrain@stanford.edu), or (650)497-6525

Please specify that you are interested in the adult hyperscanning project
