

Creativity and Humor Investigation

We are looking for **1st and 2nd grade children between the ages of 6-8** for a research study exploring brain function during cognitive task performance. Anticipated duration is 2.5-3 hours.

Participation involves evaluation including:

- Self-reports and behavioral tasks.
- Brain imaging with fNIRS. Scan is safe, non-invasive and does not use X-rays or radiation. It is used to look at brain function.

You may qualify if your child is:

- Ages of 6-8 years old
- Right handed
- Has never experienced a psychiatric disorder

You will receive:

- Access to ongoing updates about the study.
- \$30 Amazon gift card for your participation.

For more information, or to enroll in the study, please e-mail brainfunction@stanford.edu.
