VOLUNTEERS NEEDED
FOR A STUDY ON
EMOTIONS IN
VIRTUAL REALITY

ABOUT

At Huberman Lab, we are interested in studying how visually evoked emotions, such as fear and anxiety, affect our physiology.

You will get to experience a series of games, 360° videos, and a recovery session while we measure your physiological and behavioral responses.

INCENTIVES

- Play in new Virtual Reality Lab
- Full parking reimbursement
- Stanford Medicine T-Shirt
- Help find reliable measurements to better diagnose, track and treat mental disease

ELIGIBLE?

- 18 and older
- Not Pregnant
- No Glasses (contacts or nearsighted ok)

Email hubermanVRlab@stanford.edu to apply
