

DO YOU HAVE DEPRESSION ANXIETY OR PTSD?

Come be a part of our
Virtual Reality Study on
Anxiety and Therapeutic
Interventions

At the Huberman VR Lab, our goal is to create reliable tools for mental health that can be used for more accurate diagnoses and treatment plans.

ABOUT

The study consists of a series of 360° movies and games and a recovery session while we measure your physiological responses. The experiment will take approximately 2 hours and all subjects have the option to stop at any time and still receive benefits.

INCENTIVES

- Up to \$40 compensation
- Parking reimbursement
- Personalized Breathing Exercise to take home
- Be a part of research to better understand and treat mental health

ELIGIBILITY

- 18 and older
- Not Pregnant
- Currently experiencing anxiety symptoms (diagnosed or undiagnosed)
- No Glasses (contacts or nearsighted ok)
