

Healthy Kids + Teens for Learning & Memory study

Brain imaging study
to understand about
learning & memory
with chronic pain

We need healthy volunteers!

Healthy volunteers must be
10-24 years old and must not
be taking any medications or
have metallic dental implants.

Located at

Stanford University School of Medicine

visit includes:

• touch sensitivity testing
• quest monitoring testing

• questionnaires
• fMRI scan

Participants will receive compensation, including a picture of their brain!
